

Minutes Of Meeting (07/30/2019)

Today's meeting involved discussion on the report submission for the independent study. The due date for the report submission is 5th August. The report should be well organized consisting of the table of contents provided by the sir. The capstone project will be continued in fall-2019. Some of the doubts regarding the Independent study report were cleared and certain tasks were assigned for me to do. The tasks included going through chrome-extension development to solved the issue I'm facing in the extensions of the Dapps, along with that also need to mail the script for the installed dapps including the error, making sure that all the files are available on github and report completion. Remarks regarding the working submission and completion in time were also made by the sir. As suggested I even need to work more efficiently. Most recent goal for me is to complete the Independent study report even before 5th of august and submit it.
