

## **Minutes Of Meeting KeePassXCIPFS (20191107)**

After submitting the script and structure for the project, I was suppose to present the demo for the application. Couple of minutes after starting the demo, Dr.mateti asked me to pause and explained me the things to present in the demo and how it will be divided into different phases, as I was explaining very common things and according to him and I would not be able to complete demo in time. He guided me on how to present in the demo as well how to maintain the flow of the presentation. He also asked me to edit the database in a way that all the current passwords are divided into different groups. At last he asked me to mail the next day for meeting.
