

Minutes of meeting – 5/21/2019

Time : 2:30 pm to: 3:30 pm

Remarks :

- need to complete work on time.
- improve writing skills as the write-ups for capstone and independent study were completely vague.
- Keeping in mind the time limit and doing work.
- setting weekly or hourly targets.
- Sharing all the documents on google drive in .pdf format.
- Improving the naming scheme for sent files.

discussions:

- Documents should be sent in .pdf format as it is favorable by most browsers and is free.(not open source)
- Why passwords are bad and authentication should be shifted to bio-metrics, but still has not taken place as authentication other than passwords still have issues.
- just need to change the network layer in keypass from centralized server to decentralized network.

Tasks to complete:

- revise script and type script
- learn journal writing and maintaining weekly journal
- learning outline mode and using it
- developing trello cards of tasks to complete
- building keypass using softwares such as gradle, make or maven.Going through source code and understanding the flow of data in the application.
- Searching good software for source code line count
- Maintaining logs
- learning about assertions as well as entry and exit assertion
- reading software architecture
- Preparing an outline by monday on how key pass will work in decentralized networks.
- Understanding how password managers work and how lastpass application and google chrome store passwords.
- reading articles on why passwords are bad as well as reading my password in host computer security
- Making sure to write minutes of meeting
- Being more familiar with Git.
